

BRidge Fee Schedule

Effective: June 2026

1. Exchange & Delivery Fees

BRidge uses an ICE-style **\$0 base** model — there is no monthly subscription or plan tier. Activity is billed through usage fees, metered in real time via Stripe.

Fee Type	Rate	Basis
Exchange Fee	15 bps	Per side (buy/sell), on each trade fill's filled notional
Delivery Fee	\$1.00	Per Bill of Lading (BOL) issued
Clearing Fee	\$0.00	Reserved — activated as the product matures
Cash-Settle Fee	\$0.00	Reserved — activated as the product matures
Give-Up Fee	\$0.00	Reserved — activated as the product matures

15 bps = 0.15% of the filled notional, assessed per side. Fees accrue as usage and are billed through Stripe meters; nothing is charged at signup.

2. Institutional Data

BRidge Data — licensed market-data feeds over anonymized yard breadth — is a separate, sales-led institutional product priced by subscription tier. Contact us for terms.

3. Optional / Add-Ons

- Late Payment Fee: \$25 per invoice > 5 days past due
- Premium Onboarding (white-glove): \$199
- Audit ZIP/PDF export: Free

4. Billing & Payment

Billing is processed via Stripe (ACH & cards). There is **no base subscription fee**; usage fees accrue in real time and are invoiced on a recurring cycle. **No payment method is required at signup** — a payment method is collected before the first invoice, which is due within 5 calendar days of issue.
